

Aneroid Barograph

The Display Pattern has all around glass and additional drawer to house spare charts. It has an 8 day clock and is housed in an elegant polished wooden case.

Aneroid Barometer

The Aneroid Barometer is a robust and simple to use, wall mounting instrument for general purpose atmospheric pressure measurement. The instrument is of traditional design set on a dark wood base. The 95mm diameter dial has scales graduated in the both millibars and inches of mercury, an adjustable pointer and screw are also provided. It is an ideal instrument for observing weather related pressure trends.
