

Casella CEL Online Pro Application Software provides users of Casella Automatic Weather Stations, Nomad Portable Systems, APM ambient dust monitors and Wind Speed and Direction Systems with a powerful and versatile program for the accumulation, processing and presentation of environmental data.

Online Pro is a comprehensive 32bit application running under Windows 98, XP, 200 & NT.

This allows the operator to concentrate on the data, while maintaining and extending the flexibility with which data can be gathered and displayed. This software integrates the functions of real time data presentation, data archiving and historical presentation in a user friendly package. Software is sold under a single user licence agreement, with additional network or user licences purchased as required.

## FEATURES

- **Customer Specific Screen Displays**  
Windows bit map (.bmp) image presentation for displaying site maps, company logos, hazards etc
- **Web Page Output Facility**  
Automatic update of web-presented data. via Intranet or worldwide.
